Description			
Hi			
i would like to request a feature (especially good for new users) that will allow execution of apps on login to subtle. this can be done wither inside subtle.rb or in a seperate config file. as disscused in the irc, a simple text file where you just put the exec files (apps) which is launched with the wm would be perfect			
thx alot			
zeltak

I prefer the way via .xinitrc, it's exactly the correct file for this and you don't have to manage multiple files.
